YORK LIFT

York Lift is one of the UAE's leading providers of elevators, escalators and related services. We are an ISO9001 Certified Company. The York Lift vision is to make a positive and lasting impact on the elevator industry. We offer a wide selection of reliable and innovative escalators, elevators and accessories from world-renowned elevator manufacturers. Our innovative and environmental friendly access and transit management systems make an important contribution to mobility in urban societies. York Lift supplies, installs, services and modernizes elevators, escalators, and moving walks for almost every type of building. Our offerings range from cost-effective solutions for low-rise residential buildings to sophisticated access and transport management concepts for high-rise buildings.

York Lift specializes in the latest-technology engineering as well as mechanical and microprocessor technology products designed and rigorously tested for safety, comfort, efficiency and reliability. York Lift moves people and materials and connects vertical and horizontal transport systems through intelligent mobility solutions driven by green and user-friendly technologies. Our customers benefit from our industry experience, which spans not only technical expertise and knowledge but also, and importantly, understanding their needs, business sectors and specific logistical problems relating to locations.

At **York Lift** we believe in providing customers with options. customers can select elevator machines according to their needs. We pride ourselves on being at the cutting edge of industry developments always striving to further improve our quality standards and customer service. York Lift products can be found in many well-known buildings throughout UAE, including office buildings, shopping centers/retail establishments and specialty buildings.

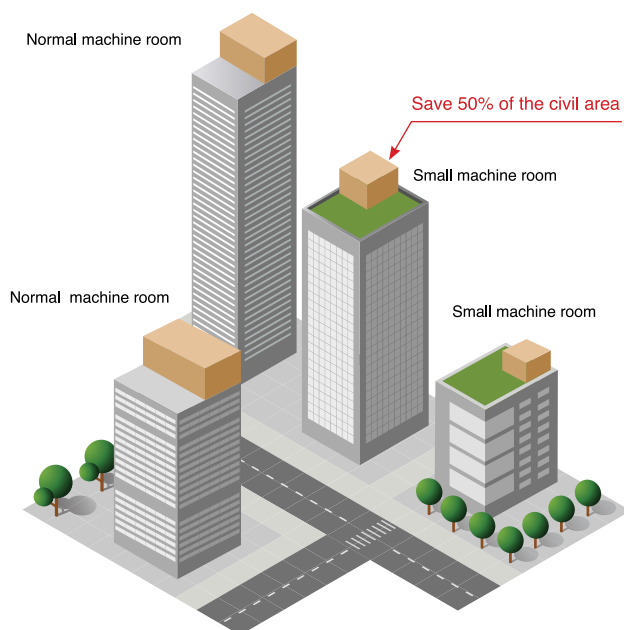

SUPPORT A
BETTER LIFE

SMALL MACHINE ROOM PASSENGER ELEVATOR

Save space, save construction costs

Compared with a normal machine room size, a small machine room could save over 50% and is easy for construction layout and increases the utilization rate of construction area.

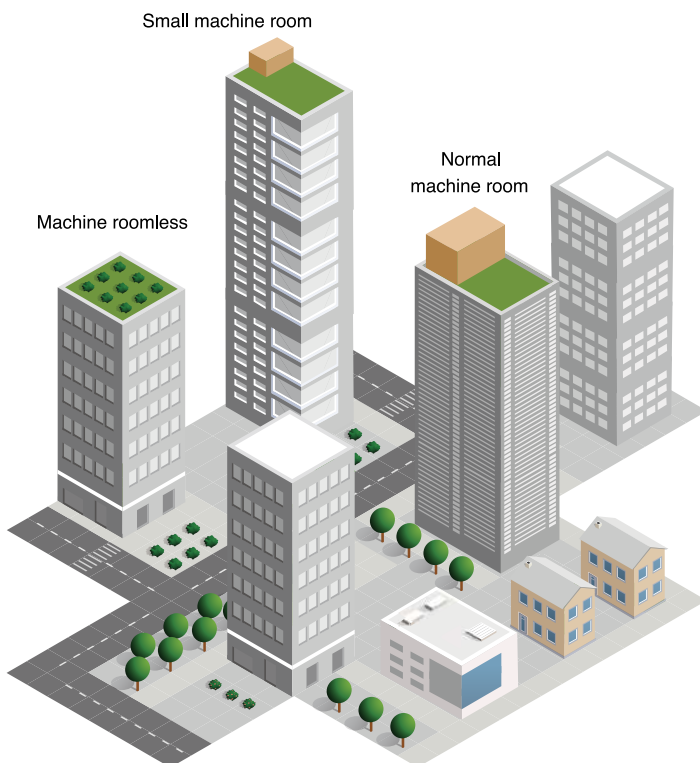

The machine room height is only 2800mm, reduced more than 20% in height than a normal machine room it saves the building cost.

MRL PASSENGER ELEVATOR

Optimize design , Create space

Machine room less elevators (usually shortened to as M.R.L or MRL) are a type of either traction or hydraulic elevator which do not require a machine room for the elevator. Put the machine room components fixed inside the shaft, save the building space, decrease the building cost

Cabin sound insulation technology, quiet and comfortable, double cabin, effectively reduces MRL elevator operation noise, Make a quieter and more comfortable environment.

CABIN DECORATION STANDARD DESIGNS

FREIGHT ELEVATOR

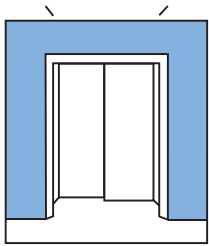

Freight Elevators are designed to move goods and materials throughout a building. Compared to passenger elevators, Freight cars travel at slower speed, can carry much heavier loads and are designed to withstand tougher working conditions

York Lift Freight elevators takes low carbon environmental protection as a design concept. It saves energy and reduces loss. It utilizes the well space to the greatest extent. It regards saving the building cost as the ultimate goal. Compared with a geared elevator with the same load level, it can save 40% of electric energy and 10% of building area.

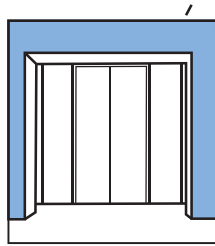

- ▶ Safe and reliable structure, high strength
- ▶ Durable, smooth operation
- ▶ Open the door operation
- ▶ Complete specification, reliable performance

ESCALATORS AND MOVING WALKS

ESCALATORS

Superior performance for the smooth line escort

In accordance with the existing international standards, new materials, and advanced technology from domestic and overseas are fully applied to design and manufacture **York Lift** the escalator has the features, such as smooth running, low noise, fine durability, easy maintenance etc.

With the compact structure, fine step rail and belt way, beautiful appearance and contemporary design, **York Lift** are widely used in shopping malls, supermarkets, subways, airports, and other high traffic sites, becoming bright flowing scenes of the constructions.

MOVING WALKS

Compact structure, reduce space: **York Lift** pedestrian short sidewalks to narrow the space span, so that the whole structure is compact, flexible adapt to the architectural pattern, for customers to save valuable building space. Divide into horizontal, inclined two product planning series, allows customers to choose according to their layout ideas.

Stability, long life: short pedal and the conveyor chain is directly connected, **York Lift** automatic sidewalk more quiet and stable operation, the whole life cycle can be greatly extended, product maintenance and more convenient. Special design of the large roller handrail drive, low noise operation, driving force, to improve the operating conditions of the escalator, so that the handrail with a longer life.

Energy saving and environmental protection, reduce costs: **York Lift** automatic sidewalk product make full use of advanced manufacturing technology, greatly improving the product performance and extent the life cycle of the machine, the direct effect to reduce the customers operating cost, the choice of variable frequency drive technology, Energy- saving effect is significant, the maximum to reduce the machines operating costs
